

# BAEC Offers EPA Certification Training & OSHA Respiratory Protection

## LEAD Safety

for Renovation,  
Repair, and  
Painting

sponsored by

**EPA's Renovation, Repair, and Painting Final Rule 40 CFR 745** requires that renovations conducted for compensation must be performed by Certified firms using Certified Renovators. This includes landlords and their employees. The deadline to do this was April 22, 2010. They began enforcing this ruling on 1/1/11.

Renovation firms that wish to work in **pre-1978** homes and child-occupied facilities must apply to the EPA and pay a fee in order to become certified. Renovators seeking to become Certified Renovators must successfully complete the EPA accredited renovator course. **The EPA began accepting applications October 2009.**

**Don't wait!** Firms who knowingly or willingly violate the EPA regulation may be fined up to \$37,500 per violation and/or face imprisonment.

### Who should take this Class?

- ◇ Home Improvement /Renovation Contractors
- ◇ Residential Rental Property Managers/Owners
- ◇ Remodelers/Carpenters
- ◇ Painters / Plumbers / Electricians
- ◇ Maintenance Personnel
- ◇ Workers Removing or Modifying Painted Surfaces
- ◇ Anyone disturbing more than 6 sq. ft. (Int.) and 20 sq. ft. (Ext.) of lead paint.

Dust from renovations, repairs, and surface preparation during painting activities creates potential lead hazards when lead-based paint is disturbed and lead-safe work practices are not used. EPA requires certification for renovation firms, and training and certification for renovators.

Prevention is the Goal. Lead dust from renovation work can cause lead poisoning in: children, pregnant women, yourself, other workers, and even pets.

### Overview of 8 hr **Renovation, Repair, and Painting**

- Registration & Introduction (including photo)
- Why Should I Be Concerned About Lead Paint?
- Regulations
- Before Beginning Work
- Contain Dust During Work
- During the Work
- Cleaning Activities and Checking Your Work

- Hands - On Activities / Review / TEST

### Overview of 2 hr **OSHA RRP Respiratory Protection Training**

This 2-hour seminar is intended to introduce business owners, general contractors and site supervisors to the concepts of respiratory protection.

The focus of the lectures and hands-on activities is directed toward the usage and maintenance and various methods of fit testing of tight respirators.

Topics include:

- The content of the 1910.134 standard and its appendices.
- The purpose, proper selection, fitting, use, and limitations of respirators.
