The **Virtual Dementia Tour**® is an individual experience through simulated dementia created for families, organizations and companies seeking to better understand the physical and mental challenges of those with dementia.

After experiencing this sensory training, you will have a greater understanding of the realities of what living with dementia is like. This unique, interactive program has been shown to improve communication and care. Learning to create a positive environment for those with dementia can only come from attempting to walk in their shoes.

Appropriate participants include:

- Caregivers
- Family members
- EMS providers
- Police officers
- Firemen

There is debriefing following the tour to discuss your experience and answer any questions that you may have.
