The CD-R/DVD-R prices include a high quality (silver top) CD-R or DVD-R.

For one color printing direct to the CD or DVD, the color options are black, red or blue.

Printed labels are printed on a white label stock using sophisticated color digital printers.

For full color thermal printing direct to the CD or DVD we use a Teac Dye Sublimation Printer. Dye Sub printing fe exceptional full CD or DVD printing at 600 dpi which is far superior to screen print. Additional fees will apply if art is not provided to specifications. In addition, professional graphic design services are available.

The CD-R and DVD-R duplication pricing is based on you providing a CD-R master as Mode 1 Closed Session. If audio has "CD Test" please indicate on the Order. All DVD masters must be finalized, no CSS, no DLT or DDP discs. If you would like us to create the master, please call and we will provide a quotation. Please call for an estimated turn time for CD-R and DVD-R duplication. The turn time varies based on the number of copies, and the amount of data on the master. Most jobs are completed within 48 - 72 hours. Shipping charges are additional.
