# *ACCUFAST*® *P4*

ACCUFAST's newest printer is it's most advanced. We've listened to our customers and created a table top printer that thinks it's a console. For example, the P4 takes pieces over a quarter of an inch thick on a vacuum transport. It's split 2 inch imaging system is unique. This is critical and practical when it comes to printing addresses and bar codes as well as return addresses on uneven surfaces like booklets.

The paper transport is open on one side to allow extra large sheets to pass, yet completely covered for safety, cleanliness and appearance. The P4 can be integrated into a system with a variety of ACCUFAST feeders, conveyors, dryers and stackers, some linked electronically for sorting and curing efficiency.

Nothing else looks like a P4, works like a P4 or returns its investment as fast as a P4. Just what you'd expect from ***ACCUFAST***.

ASMARC

ACCUFAST® P4

- **Size: 16" long x 12" high x 16.5" wide**
- **Weight: 35 lb.**
- **Production Speed: Adjustable up to 50 inches per second**
- **Electrical 120 VAC 4 amps 60 Hz.**
  230 VAC 3 amps 50 Hz. Use a grounded outlet or Uninterruptible Power Supply

- **Document Size:**
  - **Length: 14.33" (B4)**
