

## **Fairy House**

Fairies need a place to live. We will be using a mixture of natural items (twigs, pinecones, rocks, shells, bark) with the option of adding some paint and sparkle if you want. Each fairy house will be different - as they should be, because each fairy is unique and different. Hot glue guns will be used for this workshop. \$25 fee includes all materials needed, although it is encouraged to bring along some of your found little treasures to personalize your fairy house.

Tuesday August 12th @ 6pm

## **Fairy Furniture**

Fairies prefer to have their furniture constructed from recycled bits and pieces (perhaps because Ikea doesn't have small enough chairs). We will have fun making an assortment of furniture and accessories. All supplies included. Wednesday August 13th @ 6pm \$15

## **Broken Pot Fairy Garden**

The weather will be getting a little cooler, and the fairies who have taken up residence in your garden will need a warm place to spend the winter. If you don't want them to move to Florida, you'd better prepare a nice home for them that can be brought inside for the winter. This unique workshop is lots of fun, and is a great way to recycle a broken pot. Your \$15 fee includes the pot, soil, moss, gravel and a fairy. Plants and accessories are additional.

Friday August 15th @ 6pm
