

Smith's Acres LLC

A Yard-Altering Experience

Emily and Joe Magazzi of Green Earth Ag and Turf, test and distribute eco-friendly garden and lawn products that reduce the use of harmful or toxic chemicals. Joe is a frequent invited speaker on biologicals soil probiotics across the country (such as at New England Grows and NOFA) and a frequent author (Turf Magazine). Emily is a Connecticut Accredited Nursery Professional (CANP), and the co-chair of the education committee for the Connecticut Nursery and Landscape Association (CNLA). With a combined 30 years plus of experience as research scientists, Joe and Emily are your lawn and garden R&D department; you can be sure that any products that they back are thoroughly tested and are the best on the market.

About Some of Our Products:

WonderSoil is basically dried, compressed soil that is available in brick and pelletized forms. You simply water it, and WonderSoil expands to 9 times its size and much more in its weight. Once expanded, you don't need to add any more fertilizers, they are all in there. A 10 pound cube expands to 2.5 cuft or a wheelbarrow full - you have to see it to believe it!

Avenger Organic Weed Killer is a very exciting, unique non-specific weed killer. The active ingredient is extracted from citrus peels, Avenger smells like oranges. It works by dissolving the waxy plant cuticle of the weed, causing complete dehydration and the plant dies down to the root. Weeds cannot develop resistance as they do to other synthetic herbicides. Most importantly, the university studies done to date have shown that Avenger is the most effective organic weed killer on the market, is OMRI listed and is approved for use by organic landscapers and farmers.

Neptune's Harvest Organic Fertilizers are made from natural sources such as seaweed, they do not contain any artificial or harmful chemicals, and are better for you, your children, pets and the environment. Flowers and foliage will be stronger and more colorful. Blooms will be more plentiful, fragrant and longer lasting. Turfs will be greener and more resistant to drought. Seeds will germinate quicker.
